Get the message even when you leave your car—because it's printed!

The new Kleinschmidt Telescriber,[™] first radio printer designed for police vehicles. Compact, plug-in, static-free.

Step away from your patrol car with a Kleinschmidt Telescriber printer under the dash and you don't have to worry. When you come back, you'll find all your messages waiting. *Printed.*

With a Telescriber printer at work there's no way you can miss an important call. No way you can misinterpret the message. And no way your communications can be intercepted.

A Telescriber printer gives you complete information in seconds. Reports of crime. Addresses. Route instructions. Suspect descriptions. License numbers. Everything you need to know. In detail, error-free, on paper.

A Telescriber patrol car unit fits easily under the dashboard and plugs into any two-way radio. And because the messages are printed, they come in free of static and interference—even when the vehicle is moving.

Most important, the Telescriber printer is designed with Kleinschmidt quality for extra reliability and sure performance.

For full details on the amazing new Kleinschmidt Telescriber printer, write to Kleinschmidt, Division of SCM Corporation, Deerfield, Ill. 60015. Telephone 312-945-1000.

CONSTITUTIONAL LAW FOR POLICE

BY JOHN C. KLOTTER

ASSOCIATE DIRECTOR OF THE
SOUTHERN POLICE INSTITUTE

Written primarily for those engaged in enforcing the criminal laws and in the training of police officers, this important and timely book is the first in a new series of police texts designed to reflect the changing attitudes of the courts and the processes and techniques of enforcement.

To this end, the Publishers have enlisted a Police Publications Advisory Board consisting of the following, each of national distinction in this field:

Joseph D. Lohman, Dean, School of Criminology, University of California

David A. McCandless, Director of the Southern Police Institute, Louisville, Kentucky

Colonel Stanley R. Schrotel, Chief of Police, Retired, Cincinnati, Ohio

Dr. Claude R. Sowle, Dean, College of Law, University of Cincinnati

SEND FOR THIS TIMELY BOOK NOW AND EXAMINE IT AT YOUR LEISURE. USE THE CONVENIENT COUPON BELOW.

THE W. H. ANDERSON COMPANY

helicopter: versatile new patrol vehicle.

"We searched the river bed for an armed robbery suspect—and found her."

From the Sheriff's file—2/21/67. At 7:45 p.m., Los Angeles County Sheriff's Department was asked to make a helicopter search of the dry Los Angeles River bed for a female armed robbery suspect. Sky Knight deputies, on patrol in a Hughes 300, searched the area at 50 mph, using flood light. Finding suspect 5 minutes later, they radioed police cars.

Suspect apprehended (later convicted).

The Hughes 300 gives patrol a new dimension. It teams up with the radio car, multiplies its effectiveness. Helicopter officers cover far more ground, see between buildings and behind shrubbery, easily overtake fugitive cars. Even smaller cities can afford the helicopter best suited for patrol duties. The Hughes

300 costs less to buy, less to keep up, and sets a new standard for quiet operation.

Project Sky Knight, conducted by local and federal agencies with Hughes, is proving that day-and-night helicopter patrol can assure better protection for citizens of an entire city. For the full story, write: Law Enforcement Division, Hughes Tool Co., Culver City, Calif. 90230.

Introducing the GUARDS*MAN

[TOUGH PROTECTION FOR TOUGH SITUATIONS]

After two years of intensive research, the world's leading producer of protective headgear offers the GUARDS*MAN—tough, lightweight, comfortable head protection peace officers need for tactical situations. Designed with exclusive Dihedral Suspension, our GUARDS*MAN stays securely in place even without our break-away chin straps.

Impact plastic neck piece and face shield protect against thrown objects and chemical agents. The dedicated men charged with the responsibility of maintaining life and property can't ask for better head and face protection. Ask for the GUARDS*MAN. Contact your dealer, or: E. D. Bullard Company, 2680 Bridgeway, Sausalito, California 94965.

THE SAFETY PEOPLE

BUDGET SMUDGIT!

You need these films. They are not a cost but an investment.

Traffic Safety, Crime Prevention and Training motion pictures can help you in your department training and civic relations programs.

Most subjects cleared for television.

All Highway Safety Foundation motion pictures have been certified by the United States Information Agency as being of "International Educational Character."

Write today for free brochure and prices.

Now you can provide the professional,
in-service training needed to
increase efficiency and even save lives!

Every police department has at one time or the other had the problem of training new personnel and retraining their present roster at a reasonable cost. Police Science Productions has produced a series of 16mm sound films with training manuals to provide effective, low-cost "in-service" training. The entire program is complete and easy to use with a minimum of disruption to departmental routine. **EVERY MAJOR PHASE OF LAW ENFORCEMENT IS INCLUDED IN THESE 16mm SOUND FILMS:**

	Running Time		Running Time
1. RIOT PREVENTION (Color)	25 min.	6. STAY ALERT (Color)	20 min.
Technique in riot prevention.		Motor officer safety	
2. OUTNUMBERED (Color)	15 min.	7. PROWLER (B&W)	26 min.
One patrol car operation		Prowler apprehension	
3. SELF DEFENSE (Color)	18 min.	8. ACCIDENT INVESTIGATION (B&W)	28 min.
Effective come along holds		Driving under the influence	
4. NARCOTICS I (Color)	35 min.	9. HOT CAR (B&W)	26 min.
Pills and marijuana		Car theft investigation	
5. NARCOTICS II (Color)	45 min.	10. NARCOTICS "THE DECISION"	28 min.
Heroin		Public relations film (Color)	
PLAN A, PURCHASE		PLAN B, RENTAL	
Films in Color	\$300	\$35 per film	
Films in B&W	\$200	for three days

Lives up to its name: The Apprehender.

Meet Olds Apprehender for 1969. Successor to the one which automotive writer Tom McCahill, in *Mechanix Illustrated*, called "one of the three really great American automobiles" he's tested in 22 years.

And for good reason. Olds Apprehender delivers the kind of ride, handling and performance that make it a standout in police work.

So, if you're really serious about the ultra-performance requirements you need in your police fleet, check into the Olds Apprehender. It lives up to its name.

Here's some of the special equipment you can order which makes the already great Oldsmobile an even greater police vehicle!

- Heavy-duty suspension in two versions for either highway or city performance.
 - Heavy-duty, foam-padded front and rear seats.
 - Heavy-duty power front disc brakes and extra-large rear brakes.
 - Three high-powered Rocket V-8s, 310-, 365-, or 390-hp, to team up with sturdy Olds automatic transmissions.
 - Heavy-duty engine-cooling equipment.
 - Wiring harness with roof panel reinforcement for roof flasher.
 - Certified police-calibrated speedometer.
- For detailed specifications and other police extras, consult your Olds dealer. Or contact National Fleet Sales Manager, Oldsmobile Division, Lansing, Michigan 48921.

Oldsmobile: Your escape from the ordinary.

Dead drunk.

Over half the drivers in the 40,000 fatal auto accidents each year are "under the influence."

What's the answer to drunken driving?

There is a book of unlimited values to those interested in countermeasure programs against traffic accidents caused by alcoholic beverages.

ALCOHOL AND THE IMPAIRED DRIVER.

A manual to acquaint you with the behavioral and motivational aspects of the drinking driver.

A manual that discusses the effects of alcohol on the nervous system. On driving ability.

But this brand new reference goes even further.

It explains and illustrates the latest chemical testing techniques for the determination of alcohol impairment. The various test methods are the result of years of scientific research.

The medicolegal and constitutional aspects of chemical testing will give you new insights to law enforcement problems.

Will give you working methods for controlling drinking drivers.

Order your copies today. For yourself. Your entire department. Your police training school.

From the American Medical Association. Only \$1.50.

Total reliability has to be routine, when 2-way radio flies with the L.A. Sheriff's helicopter squad.

Their dependence on 2-way radio is so absolute, and the service so rough, they just have to have the best equipment available.

The Los Angeles County Sheriff's Department uses our Super-Carfone in eight helicopters . . . 20 hours a day.

Despite the almost incessant vibration and frequent landing jolts, the Super-Carfones just keep right on working. In addition to the helicopter squad, over a hundred patrol cars are RCA radio-equipped.

The Sheriff's Department sums it all up, "We are extremely demanding about our requirements. We find RCA

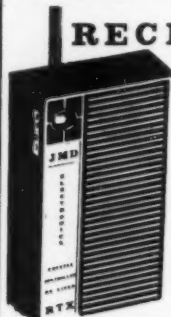

equipment has very little down-time. And it has especially low power drain. In the helicopters, it has held up beyond our expectations."

If that's the kind of equipment reliability you want, call your RCA communications specialist, Ask him about the Super-Carfone 500 —our newest and even more reliable radio. Or send your letterhead request for a fact-filled brochure to RCA 2-Way Radio, Dept. R-328, Building 15-5, Camden, N.J. 08102.

Light
can be part of
your arsenal...

tomorrow.

Nothing stops crime or civil disturbance as cold as light. Put your SKY LIGHTS* on helicopters, patrol cars, harbor boats, fire engines, tripods. You can pick out a single person six city blocks away with SKY LIGHT'S narrow beam. And with the wide one, you can light up both sides of an average city street for 500 feet.

From the air, SKY LIGHT'S 1000 watts can light up 2000 square yards to the intensity of 1000 full moons.

Available now. For immediate delivery.

Wanted by the police. The BMW motorcycle.

The BMW is the motorcycle that police everywhere want. Because its *total operating cost* is less than a penny a mile. That doesn't just mean gas, oil and tires — but — maintenance too. BMW's high reliability assures maximum availability for duty.

Officers feel fresher and more alert after a tour on a BMW than on other motorcycles. The horizontally opposed engine has minimum vibration.

Shielded ignition system and thorough grounding minimize radio communication interference. Low vibration insures long radio life.

BMW's quiet operation is ideally suited for residential patrol. At 100 feet people can hardly tell it's around. And its high-speed turnpike performance is unmatched.

Finally, BMWs are clean — tully enclosed shaft drive means no oily chain.

Now that you know how inexpensively and efficiently the BMW operates, wouldn't it be on your most wanted list?

SPEAKING & OBSERVATION DEVICE

Prisoner and visitor may talk freely and see each other with no chance of physical contact. Important, since it prevents smuggling of contraband items to prisoners. Also is used where officer needs protection from prisoner.

Lever Tumbler Deadlock for swinging doors

Enclosed in a sturdy forged steel case, this strong and husky lock withstands severe shock and stress. Equipped with lever tumblers and a 2 inch x $\frac{3}{4}$ inch saw resistant bolt, it is a tough, durable aid to security. A sliding door model is also available.

SMALL SAFEGUARDS

help avert

BIG CRISES

For over half a century, Folger Adam Co. has been famed all over the world for its prison and institutional equipment. Depend on its experience to help you maintain real security.

BALL BEARING HINGE IS TAMPER-PROOF

The hinge pin is hardened and fitted flush in a blind hold to prevent removal or tampering. Used for cell and corridor doors, entrance doors and gates. Shown: steel hinge 5" x $6\frac{1}{2}$ ", with pin $\frac{3}{4}$ " in diameter, leaf $\frac{1}{2}$ " thick.

LIGHT FIXTURE RESISTS ABUSE

All steel and tamper-resistant, with inaccessible wiring. Tubes are rapid start—48", 40-watt fluorescent, (equivalent to four 100 watt incandescent bulbs.) Also included is holder for a 15 watt night light. Stainless steel Screen does not reduce light perceptibly; prevents removal of pieces of glass that might be deliberately broken. Reflector is steel with white enamel finish. Fixture is surface mounted—49 $\frac{1}{2}$ " long x 10" high x 8 $\frac{1}{2}$ " deep.

UNBREAKABLE STEEL MIRROR

Made of highly polished chromium plated steel sheet, securely set in a strong steel frame. Furnished with attachment screws. Overall size: 10 $\frac{1}{4}$ " x 11 $\frac{1}{4}$ "; mirror 7 $\frac{1}{2}$ " x 9 $\frac{1}{4}$ ".

For further information use the Reader Service Card.

RUGGED BUT COMFORTABLE ALUMINUM BED

This bed not only resists hard usage . . . it is made so it cannot be used as a weapon in times of violence. Tubing is joined with high strength aluminum casting. Fastenings have socket-head cap screws that can't be removed without special tools. Foot flanges attached to floor. Yet it is comfortable, attractive.

X1120 Complete, with black plastic cap,
and black Life-Ring.
X2220 Complete, with blue aluminum cap,
and black Life-Ring.

RIOT-GUARD PROTECTS WITH A "FULL CIRCLE OF SAFETY."

Riot-Guard is AO's three-in-one lightweight unit designed to give maximum head protection on hazardous police duty, riots, rescue operations, disasters and storms. Riot-Guard is made up of a foam-cushioned Life-Ring®, plus full-view window, plus aluminum or plastic helmet.

The Life-Ring is mounted to the helmet with a new improved metal bracket arrangement. The window is easily mounted or removed from the Life-Ring by

means of turnbuckles. The new window is one-eighth inch thick, is deeper, and set out more than previous models. This means

greater protection, better ventilation, less fogging.

The plastic suspension keeps the helmet firmly on the head, and 1½" from the crown. One size fits all.

In Riot-Guard your men are ready for any duty. It gives them full protection. And the sooner the better.

To order, call your AO Safety Representative, or write AO.

The case for quick color

"Do-everything" KODAK EKTACOLOR® System

Rapid Color
Processor, Model 11.

The Model 11 gives you ready-to-dry Ektacolor prints in just 7½ minutes. So quick and so simple that consistently good color prints can be made by anyone in your department—just about as fast as black-and-white. The Model 11, extremely well suited either for rush jobs or normal production of color prints, can also handle color enlargements up to 11" x 14".

The Kodak Ektacolor System is a "do-everything" system . . . totally integrated Kodak products made together to work better together to make your photographic operation faster, more dependable—more economical, too! It's a system that will answer virtually all color photography needs of most police, fire, and industrial security departments.

Need good, fast color ID, evidence or investigation prints quickly and simply? A Kodak drum processor that costs less than \$200 gives you quality color prints in only 7½ minutes. It's a most economical introduction to color for your department. Quick prints can be rushed to investigators, to courtrooms, or to anyone needing color evidence, fast.

Start with Kodacolor-X or Kodak Ektacolor Professional Films for more realistic color—every time. Process with finely tuned companion Kodak C-22 Chemistry. Print on Kodak Ektacolor Professional Paper with matching Kodak CP-5 Chemistry. Process fast with the Kodak

Besides quality products and a variety of important services, Kodak has a wealth of printed information—much developed exclusively for police, fire, and security photographers. For example: *Basic Police Photography*, the Kodak Data Book that explores practical applications of photography for the investigative photographer. Many others are also available.

To learn more about any aspect of investigative photography, Kodak products, literature, or Kodak Security Seminars, write Luther Dey, Consultant on Law Enforcement Photography, Eastman Kodak Company, Rochester, N.Y. 14650.

emergency lights
use...**

**KAY-LAB®
FLASHERS**

Kay-Lab Stop-It Flasher operates turn signals, flashes on-and-off lights (up to 6 simultaneously). Widely used with slow flash (60-65 per minute) by motorcycle squads and fire chiefs. Withstands vibration, overloads; sealed against mud, dirt, water, oil. 6, 12, 24 volts.

Fire and police departments nation-wide use Kay-Labs. Order from your automotive jobber or safety equipment house... or write us for folders and prices.

Continuous product development...by DEFENSOR

"Improvement" is an important word to Defensor management. As a responsible manufacturer dedicated to quality products, Defensor is continually improving its product line to maintain that high level of protection which so many experienced policemen have grown to depend on . . . while making an arrest during a disturbance or under sniper fire.

AND DEFENSOR NOW OFFERS:

the DR (foam liner) helmet and CL (adjustable liner) helmet with . . . a FLIP-UP polycarbonate face shield. Designed to absorb the shock of bricks and clubs, this FLIP-UP face shield is available also as a snap-on accessory for your present DEFENSOR helmet. No modification is necessary as it merely slips over beak of helmet and fastens to side snaps. The standard RIGID face shield is still available for either helmet model if desired.

an ARMOR CAP designed to fit over both Defensor Helmet models offering protection against .22LR, 38 spec., 158 gr., and 45 ACP bullets. This 8-laminate ballistic fiberglass cap can be furnished with a "Police Blue" cloth cover or in a resin finish (per photo at right). The weight is less than 2 lbs. 8 oz. →

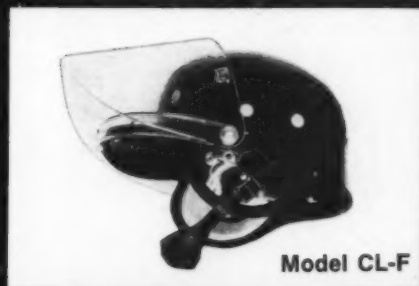

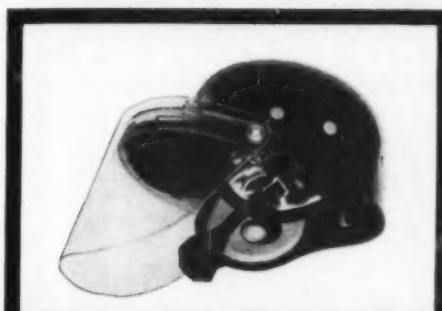

a LIGHTWEIGHT-MAGNUM ARMOR VEST weighing less than 14 lbs. offering frontal, back, and groin protection. Made of overlapping Doron fiberglass plates and covered with a strong military approved nylon material with reinforced webbing, the vest will provide protection against handgun bullets up to and including 9 mm Parabellum and the standard factory .357 Magnum load with 158 grain bullet. (Test fired on the Wilmington, Delaware, Police Range).

Move Up Faster In Law Enforcement

Train for a Place in FINGER PRINT IDENTIFICATION AND INVESTIGATION

Advance more rapidly through home study in latest crime investigation and finger print identification methods. Ever since 1916 The Institute of Applied Science has specialized in preparing ambitious police and security officers in the vital techniques of fingerprinting and identification. Today over 800 American identification bureaus employ graduates of the I.A.S. This training can open the doors to advancement in pay and rank. Many departments sponsor training with the I.A.S.

There's a big difference in uniforms. And the difference is Dacron®!

All uniforms are *not* alike. Just ask the guy who's worn uniforms made with Dacron* polyester, and he'll tell you how much better they are!

"Dacron" builds long-lasting neatness right into uniforms. They resist wrinkles, keep their creases no matter how rough the weather, how tough the job.

Second big difference:

"Dacron" is extra-strong. So uniforms made with it wear extra-long.

And look extra-good all the while!

And, for all its strength, "Dacron" is light in weight. It makes uniforms more comfortable—ideal for all seasons.

Add it up. Uniforms with "Dacron" make officers look better, feel better. Ask for "Dacron" & worsted. You can't buy anything finer!

Better things for better living
